SHIRLEY MANSON

The Garbage frontwoman and pioneer of girl-power rock talks her band's latest, *Strange Little Birds*.

THE NEW ALBUM IN THREE WORDS: "Dark, cinematic, romantic."

FIRST MUSICAL MEMORY: "I sang 'Never Smile at a Crocodile' at the Churchill Theater in Edinburgh. I was in a blue swimsuit and singing my heart out, and the teacher stuck me in the front. I immediately freaked out and couldn't look up for the rest of the performance."

ON FEMINISM: "I'm becoming more of a fierce feminist as time passes. I'm unusual in that I'm older

than a lot of women in the music industry. If you have more than one record as a woman, you're already a phenomenon. So to be talking about my sixth record is a privilege. I want to make things better for women who are coming up after me."

WORDS OF WISDOM: "The best advice I ever got was from my mom, who said 'Engineer your own happiness. Don't take your future and your joy and put it in the hands of someone else.'"
